

APECS

19 October 2011 -- FOR IMMEDIATE RELEASE

Asia Pacific Engineering Consulting Services, LLC (APECS) is pleased to announce the signing of a Representation Agreement with Pacific Propeller International of Kent, Washington.

Established in 1946, PPI has become the world's largest aircraft propeller repair facility providing global repair and overhaul services to several regional airlines as well as many of the world's military operators of large propeller aircraft. Propeller driven transport aircraft throughout the globe are also served by PPI's respected engineers and technicians. In addition to providing customers with its industry leading quality repair and overhaul service, PPI provides customer support with propeller and propulsion training and around-the-clock technical support, ensuring fleet readiness and operations.

Under the terms of the agreement, APECS will provide direct agent support to PPI in Ecuador and Peru through our office in Quito, Ecuador.

APECS is pleased to welcome PPI to our family of supported companies.
