

APECS

25 October 2011 -- FOR IMMEDIATE RELEASE

Asia Pacific Engineering Consulting Services, LLC (APECS) is pleased to announce the signing of a Representation Agreement with Wuhan Hangda Aero Science & Technology Development Co., Ltd. of Wuhan, P.R. China.

Hangda

WUHAN HANGDA AERO SCIENCE &
TECHNOLOGY DEVELOPMENT CO., LTD

Wuhan Hangda Aero Science & Technology Development Co., Ltd. is a high technology enterprise with business in the aviation industry, including aircraft component maintenance, repair, and overhaul, test equipment development and manufacturing, and aircraft ground refueling equipment research and development. As the largest MRO service provider for aircraft components in China.

Hangda is located in Dongxihu District of Wuhan, China, and has a Maintenance, Repair, and Overhaul working area of over 19000 square meters, and a newly-built landing gear overhaul shop with a working area of 16000 square meters. Hangda is CAAC, FAA, EASA, and other national and regional civil administration certified Part-145 repair station with over 2600 repair capabilities and specialty services such as plating, welding and NDT. Hangda has experience and expertise in maintenance of aircraft pneumatic, hydraulic, and electro-mechanic components installed on all Boeing, Airbus, Dornier, CRJ, ERJ, and Russian aircraft.

Under the terms of the agreement, APECS will provide direct FAA-DER, FAA RS-DER, and general engineering support to Hangda at their Wuhan facility.

APECS is pleased to welcome HANGDA to our family of supported companies.
